Sir:

COMBINED REISSUE DECLARATION AND POWER OF ATTORNEY

1. The undersigned inventors, Martin John Yates, Ian William Marshall, Julian Richard Hill, Patrick Brian Farley and Mark Bagley (hereinafter "Applicants") hereby declare that for each of them his/her residence, post office address and citizenship are as stated below next to his/her respective name and each believes that Applicants are the original, first and joint inventors of the invention entitled **RECONFIGURABLE SERVICE PROVISION VIA A COMMUNICATION NETWORK** described and claimed in the reissue specification filed as U.S. Application No. 10/732,886 on December 11, 2003 and also described and claimed in their original application, U.S. Application No. 08/875,890 filed October 14, 1997 as a national phase filing under 35

YATES et al.

Serial No. 10/732,886 (Reissue of Patent No. 6,330,586)

U.S.C. §371 of international application no. PCT/GB96/00252 filed February 7, 1996, and the resulting original U.S. Patent No. 6,330,586 (hereinafter “the ‘586 patent”) which issued December 11, 2001; for which priority under 35 U.S.C. §119 was claimed based on European Patent Application No. 95300754 filed on February 7, 1995 and Great Britain Patent Application No. 9508283 filed on April 24, 1995; and for which invention a reissue patent is solicited; that they have each reviewed and understand the contents of the attached reissue specification filed as U.S. Application No. 10/732,886, including the claims (i.e., claims 1-29) as amended by any amendment(s) specifically referred to in this Declaration; and that each acknowledges the duty to disclose information of which they are aware and which is material to the examination of the application in accordance with 37 CFR §1.56(a).

On information and belief, each of the inventors does not know and does not believe that this invention was ever known or used in the United States before Applicants’ invention thereof, or patented or described in any publication in any country before Applicants’ invention thereof, or more than one year prior to the original application, or in public use or on sale in the United States more than one year prior to the original application; that this invention had not been patented or made the subject of an inventor’s certificate in any country foreign to the United States prior to the date of the

YATES et al.

Serial No. 10/732,886 (Reissue of Patent No. 6,330,586)

original application on an application filed by the inventors or their legal representative or Assignee more than 12 months before their original application.

2. Each of Applicants, believes that, through error, the original '586 patent is wholly or partly inoperative or invalid as a legal document by reason of the Patentee claiming more or less than they had a right to claim in the patent. All errors being corrected in this reissue application up to the time of filing this Declaration arose without any deceptive intention on the part of Applicants.

3. One error relied upon as a basis for this reissue application is Applicants' failure to request a scope of coverage such as the claims accompanying this reissue application which are necessary to adequately protect Applicants' invention. This error in claiming more or less than Applicants had a right to claim in the '586 patent occurred due to an inadvertent lack of appreciation of the availability of the scope of protection as defined by the amended claims presented with this reissue application. To correct this error, this reissue application seeks to amend certain of the original claims of the '586 patent. For example, independent claims 1, 7, 11, 14, 16, 17 and 21 have been amended to include, *inter alia*, the recitation of "or code to be interpreted" and claim 3 has been amended to require, *inter alia*, "means for changing said plurality of different software modules...."

YATES et al.

Serial No. 10/732,886 (Reissue of Patent No. 6,330,586)

4. Applicants now seek to correct the errors noted in ¶3 above by requesting that the '586 patent be reissued. Accordingly, Applicants have filed the instant reissue application in order to properly claim what they have a right to claim.

Applicants hereby appoint Nixon & Vanderhye, P.C., 1100 North Glebe Road, 8th Floor, Arlington, Virginia 22201-4714, telephone number (703) 816-4000, facsimile number (703) 816-4100, and the following attorneys thereof: Arthur R. Crawford, 25327; Larry S. Nixon, 25640; James T. Hosmer, 30184; Robert W. Faris, 31352; Richard G. Besha, 22770; Mark E. Nusbaum, 32348; Michael J. Keenan, 32106; Bryan H. Davidson, 30251; Stanley C. Spooner, 27393; Leonard C. Mitchard, 29009; Duane M. Byers, 33363; Jeffry H. Nelson, 30481; John R. Lastova, 33149; H. Warren Burnam, Jr. 29366; Mary J. Wilson, 32955; Alan M. Kagen, 36178; Robert A. Molan, 29834; B. J. Sadoff, 36663; Updeep S. Gill, 37334; Michael J. Shea, 34725; Michelle N. Lester, 32331; Frank P. Presta, 19828; Joseph S. Presta, 35329; Joseph A. Rhoa, 37515; Raymond Y. Mah, 41426; Chris Comuntzis, 31097; Gary R. Tanigawa, 43180; Paul T. Bowen, 38009; Willem F. Gadiano, 37136 as my attorneys in the above-entitled application, to prosecute this application, to make alterations and amendments therein, and to transact all business in the Patent and Trademark Office connected therewith.

CONSENT OF ASSIGNEE AND OFFER TO SURRENDER

The undersigned, being the Assignee of record in U.S. Patent No. 6,330,586 as evident by the chain of title from the inventors to the undersigned as recorded on reel 8827, frame 0505, hereby consents to the reissue of the subject patent and hereby offers to surrender the original U.S. Patent No. 6,330,586 when required to do so in these reissue pleadings.

The undersigned hereby certifies that, to the best of Assignee's knowledge and belief, title is in the undersigned Assignee.

The undersigned person hereby states that he is empowered to sign this document on behalf of Assignee.

U.S.C. §371 of international application no. PCT/GB96/00252 filed February 7, 1996, and the resulting original U.S. Patent No. 6,330,586 (hereinafter “the ‘586 patent”) which issued December 11, 2001; for which priority under 35 U.S.C. §119 was claimed based on European Patent Application No. 95300754 filed on February 7, 1995 and Great Britain Patent Application No. 9508283 filed on April 24, 1995; and for which invention a reissue patent is solicited; that they have each reviewed and understand the contents of the attached reissue specification filed as U.S. Application No. 10/732,886, including the claims (i.e., claims 1-29) as amended by any amendment(s) specifically referred to in this Declaration; and that each acknowledges the duty to disclose information of which they are aware and which is material to the examination of the application in accordance with 37 CFR §1.56(a).

On information and belief, each of the inventors does not know and does not believe that this invention was ever known or used in the United States before Applicants’ invention thereof, or patented or described in any publication in any country before Applicants’ invention thereof, or more than one year prior to the original application, or in public use or on sale in the United States more than one year prior to the original application; that this invention had not been patented or made the subject of an inventor’s certificate in any country foreign to the United States prior to the date of the

Serial No. 10/732,886 (Reissue of Patent No. 6,330,586)

original application on an application filed by the inventors or their legal representative or Assignee more than 12 months before their original application.

2. Each of Applicants, believes that, through error, the original '586 patent is wholly or partly inoperative or invalid as a legal document by reason of the Patentee claiming more or less than they had a right to claim in the patent. All errors being corrected in this reissue application up to the time of filing this Declaration arose without any deceptive intention on the part of Applicants.

3. One error relied upon as a basis for this reissue application is Applicants' failure to request a scope of coverage such as the claims accompanying this reissue application which are necessary to adequately protect Applicants' invention. This error in claiming more or less than Applicants had a right to claim in the '586 patent occurred due to an inadvertent lack of appreciation of the availability of the scope of protection as defined by the amended claims presented with this reissue application. To correct this error, this reissue application seeks to amend certain of the original claims of the '586 patent. For example, independent claims 1, 7, 11, 14, 16, 17 and 21 have been amended to include, *inter alia*, the recitation of "or code to be interpreted" and claim 3 has been amended to require, *inter alia*, "means for changing said plurality of different software modules...."
